
State, County and Local Government Asset Management Services

Lockwood Technology supports state, county and local government agencies by providing inventory verification services and a suite of RFID/barcode-based full asset lifecycle management solutions. These services and products are widely used nationally and can be acquired through US Communities purchasing alliance. Lockwood's association with a purchasing vehicle manager facilitates the acquisition of asset management services and products. Contact info@lockwoodtechnology.com.

U. S. Communities Government Purchasing Alliance

The Florida Association of Counties along with the National Association of Counties, the National Institute of Governmental Purchasing, the National League of Cities, and the United States Conference of Mayors sponsors the U.S. Communities Government Purchasing Alliance.

The U.S. Communities program provides all local agencies in the U.S. with publicly, competitively-bid contracts for various products and services. Most local agencies may piggyback on a contract competitively bid by another public agency, thereby eliminating the need to re-bid. Through the buying power of large purchasers in the U.S. Communities program such as Los Angeles, CA. and Fairfax County, VA., all local government agencies receive access to excellent pricing and contract terms.

U.S. Communities offers local agencies:

- Competitively bid contracts by a lead local agency.
- Most favorable local agency pricing.
- No cost to participate.
- National sponsorship by leading associations and purchasing organizations.
- A broad range of high quality products such as office/school supplies, office furniture, industrial supplies, electrical & data communication supplies, and computer hardware/software.
- The aggregate purchasing power of public agencies nationwide.
- Management by public purchasing professionals.
